Frontend Engineer with 5+ years of production experience building scalable web applications using Vue 3, Nuxt 3, and TypeScript. Proven track record of owning end to end frontend architecture from component systems to performance optimization to pixel-perfect UI implementation. Passionate about clean, maintainable code and seamless user experiences across devices.

WORK EXPERIENCE

Vizmo

Software Developer

August 2022 – April 2026

Vizmo is a B2B SaaS company providing enterprise-grade Visitor Management, Desk and Room Booking workplace operations software.

- Architected and delivered scalable frontend modules for a B2B SaaS Visitor Management System used across enterprise clients, using Vue 3, Quasar, and TypeScript.
- Designed and documented a reusable component library that standardized UI patterns across the product, reducing feature development time and onboarding friction for new engineers.
- Improved application performance through lazy loading, code splitting, and build tooling optimizations measurably reducing bundle size and improving load times across the product.
- Owned responsive design implementation across a complex multi role web app, ensuring consistent experience across 5+ tested browsers and both desktop and mobile viewports.
- Partnered with backend teams to design and integrate RESTful APIs for real-time visitor tracking, meeting room management, and role based access flows.
- Contributed to and led code reviews, enforcing TypeScript best practices and component design standards that raised overall code quality across the frontend codebase.
- Operated in a fast-paced Agile environment, translating Figma designs and product requirements into production-ready features on tight sprint cycles.
- Led solo end-to-end development of Vizmo's marketing website using Astro JS translating Figma designs into a pixel-perfect, fully responsive implementation that serves as the company's primary product and sales touchpoint.

Digital Biz Tech

Web Developer

May 2021 – August 2022

Digital Biz Tech is a web development agency offering services like Salesforce consulting and custom web development.

- Built and maintained client-facing websites and internal tools for a web development agency, independently managing projects from requirements gathering to deployment.
- Served as the primary point of contact for client communication, gathering requirements and delivering solutions that aligned with business goals and timelines.
- Independently architected and delivered a fullstack web platform for a US-based non-profit (AITL), featuring role-based access control and content management.

PROJECT EXPERIENCE

Digital Biz Tech Website

- Sole developer of the company's public website, built with Gatsby and Netlify CMS delivering a fast, content-managed site that served as the agency's primary lead generation channel.
- Project link - digitalbiz.tech

American Institute of Tamil Language Website

- Designed and developed a fullstack web platform for AITL (a non profit organization), featuring a Firestore backed CMS for blog publishing and page management, Firebase auth, role based access control, PDF upload support and deployed on GCP App Engine.
- Project link - americantamil.org

Picxilens

- Picxilens is a platform for photographers to promote their work and get new opportunities.
- Technologies used - Nuxt.js, Firebase, GCP App Engine.

TECHNICAL SKILLS

- **Frontend:** Vue 3, Nuxt 3, Next.js, React, TypeScript, Quasar, Tailwind CSS, Gatsby
- **Backend / BaaS:** Node.js, Express, Firebase (Auth, Firestore, Storage), GCP App Engine, Cloudflare R2
- **Tools & Workflow:** Git, Figma, Netlify, Agile / Scrum, Railway, Storyblok, Jira, CI/CD
- **AI Tools:** Claude, ChatGPT
- **Familiar with:** MongoDB, Redis, BullMQ, AWS, GraphQL Headless CMS, SEO, Playwright, Pinia

EDUCATION

**Manoharbai Patel Institute of Engineering and
Technology, Gondia**

August 2017 - July 2021

Bachelor of Engineering in Computer Technology - RTMNU

CGPA - 9.54 / 10

LANGUAGE

English, Hindi

DATE OF BIRTH

24 September 1999
